

MatchRV Intelligence Report

The Science of High-Velocity RV Sales

Prepared for: Dealership Principals & Sales Managers

Date: June 18, 2026

Subject: Inventory Intelligence & AI Lead Agent

Executive Summary

In the modern RV marketplace, the difference between a unit sitting on the lot for 120 days and a 15-day turn is increasingly driven by **data-driven precision**. MatchRV provides dealerships with a two-pronged intelligence suite: **Inventory Intelligence**, which optimizes your lot for regional demand, and the **AI Lead Agent**, which delivers pre-qualified, high-readiness buyers with a roadmap for closing.

I. Inventory Intelligence: Optimizing the Lot

The MatchRV Inventory Intelligence dashboard is designed to transform "gut feeling" inventory management into a strategic science. By aggregating millions of behavioral data points from the MatchRV marketplace, we provide dealers with four critical outputs:

1. Aged Inventory Management

The system automatically identifies units exceeding **90, 100, and 120 days on lot**. Our algorithms analyze regional pricing trends to provide a **Suggested Drop** value. This isn't just a flat percentage; it is a calculated recommendation designed to trigger a "Hot Deal" status in our buyer-facing marketplace, reigniting interest in stagnant stock.

2. High-Interest Unit Tracking

We track every "micro-interaction" on your listings. When a unit receives a surge in **Leads Viewed** or **Leads Saved**, it is flagged as a "Hot Demand" unit. This allows your sales team to prioritize these units for front-line placement and prevents premature price drops on units that are already gaining organic momentum.

3. Demand Gap Analysis

This is the most powerful tool for your sourcing team. We compare **Active Search Volume** (what buyers are looking for) against **Live Stock Levels** (what is actually on the lot).

Example: If 28 leads are searching for "Bunkhouse trailers 32-38ft" but you only have 4 in stock, the system flags a **High Urgency Demand Gap**, signaling a clear opportunity to source or trade for that specific category.

4. Data Sourcing & Conclusions

Our conclusions are reached by cross-referencing three primary data pillars:

- **Proprietary Marketplace Data:** Real-time search and engagement metrics from MatchRV.com
- **Dealer Inventory Sync:** Daily feeds via CSV, SFTP, or API that ensure we are analyzing your exact current stock
- **Regional Market Signals:** Aggregated pricing and velocity data from across the Pacific Northwest

II. The AI Lead Agent: Precision Qualification

The **AI Lead Agent** is an autonomous system that works 24/7 to identify, qualify, and score buyers before they ever speak to your sales team. It moves beyond simple "contact us" forms to provide a deep behavioral profile for every lead.

How the Readiness Score is Calculated

Every lead is assigned a **Readiness Score (0–100%)**. This score is not arbitrary; it is a weighted calculation based on five behavioral factors:

Factor	Weight	Description
Listing Activity	30%	Frequency of views, time spent on specific floorplans, and recency of visits
Save & Shortlist	25%	Units added to wishlists, side-by-side comparisons, and brochure downloads
Financial Intent	20%	Usage of payment calculators, financing page engagement, and trade-in tool usage
Behavioral Velocity	15%	The acceleration of engagement (e.g., a buyer who visits 5x in 2 days vs. 5x in 2 weeks)
AI Pattern Matching	10%	Comparison against thousands of historical successful RV purchase patterns

Lead Tiers and Actionability

Leads are categorized into four distinct tiers to help your team prioritize their day:

- **Hot Lead (85–100%):** Immediate follow-up required (within 15 minutes). These buyers have validated their tow capacity and budget.
- **High Intent (65–84%):** Active buyers ready for a walkthrough.
- **Researching (45–64%):** Nurture leads looking for educational content.
- **Early Stage (0–44%):** Long-term prospects for email marketing.

III. Sales Enablement: The "Recommended Opener"

To ensure a seamless hand-off, the AI Lead Agent generates a **Recommended Sales Opener** for every lead. This script is personalized based on the specific units the buyer has engaged with and their unique "Match Report" results.

"Michael, I noticed you've been comparing luxury fifth wheels—the Solitude 380FL matches 98% of your wishlist including the dual slides. We have one in stock at Fife right now. Want to schedule a walkthrough?"

By providing your reps with the **exact reason a buyer is interested**, we eliminate the "cold call" feel and move straight to the consultation.

IV. Transparency & Billing

Every lead delivered through MatchRV is billed transparently based on its Readiness Score tier. Your dealership only pays for leads that meet your quality threshold, and you have full visibility into the scoring methodology behind each lead.

- **Hot Leads (85–100%):** \$495 per lead
- **High Intent (65–84%):** \$295 per lead
- **Researching (45–64%):** \$195 per lead
- **Early Stage (0–44%):** \$49 per lead
