DEALER INTELLIGENCE PLATFORM

How Your Buyer Dashboard Works

Every lead delivered to your MatchRV dashboard carries a full behavioral profile — scored in real time from first-party signals collected as the buyer researches on our platform.

THE BUYER JOURNEY

How MatchRV Delivers Pre-Qualified Buyers

A buyer visits matchrv.com, researches RVs, and when they're ready submits a lead. That lead arrives in your dashboard pre-loaded with everything they did before clicking "Contact."

1

**Buyer Arrives**

Finds MatchRV via Google, social, or direct referral.

2

**Browses & Filters**

Searches inventory, applies filters, views listings, checks tow fit.

3

**AI Match Report**

Answers discovery questions. AI matches them to live WA dealer inventory.

4

**Lead Submitted**

Hits contact or match report. Full behavioral profile is packaged.

What Arrives in Your Dashboard — Per Lead

CONTACT INFO	RV INTENT	BEHAVIORAL SIGNALS	AI ANALYSIS
• Full name • Email address • Phone number • Submitted timestamp	• RV type searched • Budget range • Length preference • Tow vehicle (if known)	• Pages viewed • Listings opened • Filters applied • Saved listings	• Readiness Score % • Intent tags (Hot Lead, etc.) • Location signal • Top 3 RV matches

Why This Matters

Traditional RV leads give you a name and phone number and nothing else. **MatchRV leads include the buyer's complete research journey:** what they searched, what they viewed, how many times they came back, and an AI-generated readiness score so your team knows who to call first.

THE READINESS SCORE

A 0-100% score automatically calculated from each buyer's on-site behavior. No sign-in required. The score travels with every lead the moment they submit.

EXAMPLE SCORE

84%

HIGH INTENT BUYER

85-100%	Hot Lead	Call immediately
65-84%	High Intent	Warm outreach today
45-64%	Researching	Nurture sequence
0-44%	Early Stage	Marketing follow-up

How Points Are Calculated

Every buyer action silently adds to their score. Caps prevent gaming. Score updates in real time.

Match Report completed	+60 pts	The moat — strongest signal
Match Report core Q&A	+25 pts	Type, use case, budget, location done

BEHAVIORAL SIGNALS (CAPPED AT 40 PTS TOTAL)

Page views	+1 pt	Capped at 8 pts
Filter changes	+3 pts	Capped at 12 pts
Searches run	+2 pts	Capped at 8 pts
Listing views	+5 pts	Capped at 16 pts
Listings saved	+8 pts	Capped at 10 pts — strong signal
Contact form opened	+6 pts	Dealer contact intent
Lead submitted	+14 pts	Highest explicit intent action
Tow calculator used	+5 pts	Buyer matching RV to vehicle
Return visit	+5 pts	Not a one-time browser
Location detected	+6 pts	Local buyer confirmed

Worked Example

A buyer visits twice (+5), views 4 pages (+4), runs 1 search (+2), views 3 listings (+15), saves 1 listing (+8), opens the contact form (+6), and submits a lead (+14). **Base 5 + 5 + 4 + 2 + 15 + 8 + 6 + 14 = 59% — Researching.** If they had completed the Match Report first: 59 + 25 = 84% High Intent. Full Match Report: 59 + 60 = 100% — instant Hot Lead.

DASHBOARD KPI METRICS

The four top-line numbers on your dealer dashboard — what they mean and where the data comes from.

ACTIVE LEADS

N

All leads currently in your pipeline from MatchRV.

LIVE DATA

HOT LEADS (≥85%)

N

Count of leads with a Readiness Score at 85% or higher.

LIVE DATA

AVG READINESS

XX%

Mean readiness score across all your active leads. Updates with each new lead.

LIVE DATA

QUOTE ACCEPTANCE

41%

Will calculate from "Quoted" vs "Won" lead statuses once populated.

DEMO

Understanding the Data Labels

Active Leads & Hot Leads — LIVE
Pulled in real time from the MatchRV lead database. Every time a buyer submits a contact request or match report, it appears here. "Hot Leads" is a live count of leads at or above 85% readiness — your best opportunities right now.

Quote Acceptance Rate — ROADMAP
Currently shows an illustrative 41% based on industry benchmarks. Will become a live calculation once dealers begin updating lead statuses (Quoted → Won). Formula: Won leads ÷ Quoted leads.

Average Readiness Score — LIVE
Calculated automatically: sum of all lead readiness scores ÷ total leads. Rises as higher-intent buyers come in; provides a quick read on pipeline quality this week vs. last.

Projected Revenue — ROADMAP
Will calculate as: (open leads × dealer avg deal size × expected close rate). Requires each dealer to set their average transaction value in settings. Coming in a future dashboard update.

Buyer Intent Tags — Auto-Applied Per Lead

Hot Lead — Score ≥85

High Intent — Score ≥65

Researching — Score ≥45
