AI READINESS SCORE

Your data exists, but AI can't see it

Finding 1: all 40 listing pages we checked come up **blank** to AI readers — no price, specs, or headline visible.

Finding 2: sleeping capacity, length, RV type, and location are **missing on every unit analyzed** (0 of 14).

Finding 3: your site could prove the answer to only **1 in 4** real shopper questions. The rest go to competitors.

What shoppers asked — could your site prove it?

SHOPPER QUESTION	RESULT
"Travel trailer under \$40,000 near Tacoma?"	No verifiable match — no unit states its RV type
"Which units sleep 6?"	No verifiable match — sleeps missing on 14 of 14
"Fifth wheel under \$75,000?"	No verifiable match — type + specs missing

Want the fix list? The full 4-page report ranks all 5 fixes by lead impact — most of it is one job for your website person plus an afternoon of data entry. Reply to this email or grab 10 minutes and we'll walk through it.
